Sequel Impact

See your total exposure in a single view.

“Sequel Impact is the first product to bring together such a range of features and make them so easy to use. There’s no better way to improve visibility of risk and exposure across your organisation.”

Guy Williams, Aggregation Expert

A powerful web-based analytical engine

- Web-based, graphically rich application
- Works on any internet-enabled device
- Integrates with your existing system ‘out of the box’
- Helps visualise non-modelled catastrophe risk
- Flexible and configurable to cater for all classes of business
- Analyse any insurable risk across multiple business classes, by any metric
- Fully integrated geocoding and reverse geocoding

Quantify your total risk exposure for any scenario

- Make better informed decisions, faster
- Calculates loss scenarios from all available data at the touch of a button
- Watch every insurable asset automatically upload, with offshore risks enriched with external data
- Explore and analyse data with powerful tools
- See the impact of a newly quoted policy – or the projected impact of an impending catastrophe
- Overlay simulated events like earthquakes, fires or floods onto geographic areas for pin-point prediction of your exposure
- Import and export data in a variety of formats
