

sequel

Sequel Re Reinsurance just went real-time.

Enjoy real-time cession and recovery calculations and workflows with unprecedented accuracy and granularity. In a powerful, flexible platform that covers every outwards reinsurance scenario.

Sequel Re

Real-time web-based workflows for every ceded reinsurance scenario.

More power, flexibility and accuracy

- Manage the entire reinsurance process from initial policy enquiry through to credit control and cash management
- Cover the full suite of reinsurance policies (facultative, proportional treaty, and non-proportional contracts)
- Calculate your recoveries with unprecedented accuracy
- Investigate your reinsurance transactions with finer granularity than any other system on the market
- Model any of the rules involved
- Execute operations as and when you want – allowing you to work the way you do best

Market-leading features

- Proactive reinsurance workflow system
- Flexible and powerful coverage rule and limit calculation engine
- Standalone web front-end
- Automated Premium cession, adjustment, and reinstatement processing
- Focused data enrichment: Sequel Re tells you what additional data you need, just when you need it
- Automated periodic statement generation in electronic and paper form, and proactive workflows for cash calls and loss advices
- Powerful credit control, including notification of overdue statements and two-way LORS integration with automatic cash allocation
- Extremely granular transactions in original, settlement, and limit currency allowing for very flexible downstream reporting
- Full audit history of all changes, calculations, and limit erosion
