

## Sequel Claims

It's only complicated on the inside

## Turn claims into a competitive advantage, handle claims faster and more fairly

- A uniquely powerful workflow engine that offers a completely configurable view of your claims data and bottle necks in your process
- A beautifully intuitive interface
- Advanced automation
- Reduce claims leakage and claim handling time
- Standalone or integrate with existing systems
- Supports Brokers, MGAs, Underwriters and Delegated Managed Claims

### First Notification of Loss

- Visualise and act on claims data in real time
- Work within a single system with ECF Integration
- Email integration for managing incoming emails with automatic triaging and routing based on mined data and template driven outbound emails

### Triage and Routing

- Configure automatic or manual routing features to suit your business

### Claims Management

- Configurable Data and Screens to support and drive process automatically, document production or analytics
- Tag records and search for them intelligently
- Prevent breaches of service levels with SLA tracking
- Management of Third Parties
- Document Management and Production
- Deploy product versions or configure bespoke workflows for actions such as Sanction and Fraud checks

### Reserves and Payments

- Financial management in multiple currencies and levels of granularity
- Manage authorisation limits and peer reviews

### Reporting and Analytics

- Standard Reporting
- Categorising and Grouping of Claims to support processing across multiple losses and richer reporting
- Audit history and Claims Timeline
- Events and Catastrophe management
